

Tempnote® lite V2.0

Single Use Temperature Data Logger

IMPROVED ACCURACY $\pm 0.2^{\circ}\text{C}$

Most Precise.

➤ Auto Generated PDF & CSV Reports

➤ 2 years Shelf - life

➤ Supports 5 multiple alarm ranges

➤ User Programmable

➤ Validation Certificate included

Economical Single-Use Temperature Data Logger for Cold Chain Monitoring during Transit

Tempnote® lite V2.0 dataloggers are highly engineered for reliable cold chain monitoring during transit. Tempnote® lite V2.0 offers in-built USB & Plug-N-Play features for auto-generating secured PDF & CSV report without requiring additional Hardware or software. Tempnote® lite V2.0 dataloggers are equipped with highly precise digital sensor with accuracy of $\pm 0.2^{\circ}\text{C}$. NIST traceable Manufacturer's Certificate of Validation is included to comply with Quality Assurance needs.

PDF & CSV REPORT

Automatically generated PDF & CSV format report, no software required to access data files.

VALIDATION CERTIFICATE

Six Points Validation Certificate included for proven accuracy and to comply with regulations

EN12830 CERTIFIED

Compliant with European standards to meet the demands of the transportation industries

SLIM & COMPACT DESIGN

Super compact design to accommodate in the product box without utilising extra space.

USB CONNECTION

Integrated USB for most conveniently download data report without additional interface or cable.

IP67 RATING

Highest Protective design ensures best performance even in complex environmental conditions.
